

Privacy Statement 2018

Privacy Law 2018

In The Netherlands the European General Data Protection Regulation (GDPR) law will be enforced at May 25th 2018.

It is about the export of personal data outside the EU and storage of your personal data.

Company statement

GSO (Graphic Services and Organisation) has five internet websites concerning this law: gso-nl.com, privateconnection.net (PCN), 3dollarhosting.net, 3eurohosting.net and 3poundhosting.net.

- Personal data stays on the private GSO servers and will never be sold, given away or used for commerce
- Data and server protection is at high level
- Intelligence agencies like CIA and Dutch AIVD can request for a specific user or connection data on a specific date time
- GSO does not allow random bulk search analysis by intelligence agencies

Online storage of user and connection data

- All mentioned websites store IP address, date of time visit and number of visits as statistical data on the private GSO servers
- Account and login data is stored with username and encrypted password, IP address, email address and date time accessed
- When using a PCN proxy server user website visits are stored for 2 months and can only be read by the account user and the database administrator
- Website data from the public self maintainable websites on 3dollarhosting.net, 3eurohosting.net and 3poundhosting.net is stored on the private GSO servers and can be seen when the website pages are read by any person and robot visiting the public website
- Website data from privateconnection.net is stored on the private GSO servers and can only be seen by the account user and visitors who know the password for the private website
- PCN mail, pictures, safebox (vault) and notecards are stored encrypted on the private GSO servers and can only be seen by the account user and users who are granted by the account user to see it
- PCN bookmarks are stored on the GSO servers and can only be seen by the account user and the database administrator
- Site and database backups are stored on the private GSO servers

Cookies and (tracking)scripts

- All mentioned GSO websites do not track on visitors
- Cookies are only used for the login session and at PCN for storing the preference, if you like your bookmarks on, at the home page even if logged out

Secured https web connection

- PCN (privateconnection.net) uses a certified SSL server certificate, which is authorized by godaddy.com. It provides encrypted site data transfer between server and end user
- PCN (secured.privateconnection.net) uses a self signed SSL server certificate. It provides encrypted site data transfer between server and end user that cannot be decrypted by others
- 3dollarhosting.net, 3eurohosting.net and 3poundhosting.net use a secured servlet login on PCN. When logged in or at regular webvisits the sites run under http (without a secured SSL certificate)

Offline storage

GSO stores customer data (name, address, zipcode, city, country, email address, telephone, bank transactions) for accounting/bookkeeping.

Personal data or delete request

According to this European GDPR law everybody can request for what personal data is stored. We are very happy to help you with that request. You need to specify as much from your self and have to pay 100 Euro in advance for administrative costs.

A delete request is also possible, but GSO is not allowed to delete recent bank transactions and accounting/bookkeeping data because the Dutch tax office demands 10 years of storage.
